

# METAL

## INNER DIAMETER AND PROFILE

Thanks to endoscopic miniaturized optical heads our **systems** can measure with **micrometric precision** the **inner profile** of **metal parts** with one or more cavities.

The **supervisor software** shows **inner profile** and **provides comprehensive tools** for **analysis**.

### APPLICATIONS

- precision CMM machining and grinding
- hydraulics industry
- parts for automotive

### ADVANTAGES

- **measuring is contactless** and **doesn't damage** the measured object
- **high accuracy**
- **total safety** for operators (non-ionizing and non-radioactive light)
- **easy to use**
- **quick reporting**
